

Università degli Studi di Camerino

SCUOLA DI SCIENZE E TECNOLOGIE Corso di Laurea in Informatica (Classe L-31)

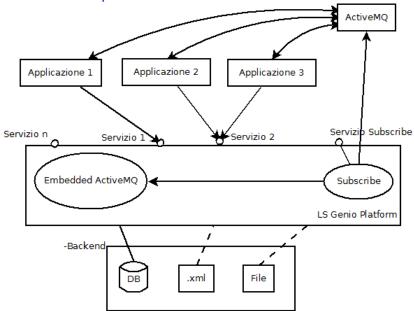

LS Genio Platform

Laureando Vincenzo Nucci		Relatore Dott. Rosario Culmone
Matricola 092861		
Laureando Matteo Tiberi		Correlatore Dott. Leonardo Vito
Matricola 092913		
	A.A. 2016/2017	
	A.A. 2010/2011	

Obiettivi

- Piattaforma REST indipendente da sorgenti dati
 - Autenticazione tramite token
 - ▶ Interfaccia web
- Servizio di sottoscrizione "subscribe"
 - Notifica dei messaggi PUSH
- Integrazione dei servizi con NAV
- Servizio di monitoraggio dei dati
 - Controllo valore oltre soglia

        e.printStackTrace();
```

Difficoltà incontrate

- Integrazione subscribe con NAV
 - Utilizzo Web Service SOAP

Tecnologie utilizzate

- Java
- Framework Jersey e Grizzly
- Apache Avro
- Apache ActiveMQ
- Framework ZK
- Apache Flink

Risultati raggiunti

- Piattaforma indipendente
 - Classi astratte e interfacce
 - Database SQLite per autenticazione token
- Servizio subscribe debolmente accoppiato
 - Tramite message broker
- Servizio monitoraggio dei dati
 - Grafico per visualizzare andamento
 - Apache Flink per controllo soglia

Obiettivi

- Interazione di Microsoft Dynamics NAV con la piattaforma LS-Genio Mashup e definizione di un "setup" per l'utente
- Realizzazione di un ontologia delle misurazioni e delle misure

Problematiche e risoluzioni

- Software Microsoft Dynamics NAV che possiede numerose limitazioni, ostacolando l'interazione con la piattaforma
 - Risolto mediante implementazione di un client C#, integrato poi su NAV
- Difficoltà nel trovare un modello ontologico relativo al case study
 - Risolto mediante adattamento allo standard ISO 19156:2011

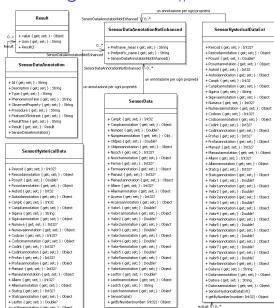

Tecnologie e software utilizzati

- C#
- Apache Avro
- Microsoft Dynamics NAV e C/AL code
- Microsoft PowerBI
- Protégé
- MySQL

Standard Observation and Measurement ISO 19156:2011

- Standard basato sul concetto di osservazione, con implementazioni in formato XML e JSON
 - Pensato per l'ambito geospaziale, il modello risulta astratto e applicabile nel case study
- Concetto di osservazione generico specializzato in base al risultato (es. Measurement)
 - Solo alcune specializzazioni sono utilizzate nel case study
- Al risultato di una osservazione specializzata viene poi associata un ontologia delle misure

Conclusioni

- L'integrazione tra NAV e la piattaforma ha avuto esito positivo tramite uso del client C#
 - ▶ Permettendo agli utenti un semplice utilizzo dei servizi
- L'ontologia delle misurazioni e delle misure è stata implementata
 - ▶ In modo da avere una descrizione dei dati ottenuti dai servizi
